

# PDF Index Assistant

AKS-Labs has released version 3.0 of PDF Index Assistant, a Windows utility designed to create and search in index of Adobe Acrobat PDF files.

PDF Index Assistant supports indexing of popular Adobe Acrobat PDF files. With PDF Index Assistant you can index PDF files on local disks, across a network and in zip archives.

The first step you should do is to index some existent files.

Various indexing options, such as dynamic re-indexing make search in index more effective.

PDF Index Assistant has some options, that make it extremely useful tool for any kind of search.

PDF Index Assistant has special "Preview" pane, which was designed to save user from routine job. You can search for some text in different documents and PDF Index Assistant will show you a small piece of found file with your keyword marked as a bold text.

Once you have got some search results, you can also copy or move found files and folders from your search results to another folder. Also, you can generate a report file. This file contains all the search results you have got and quotations from the text of found files. You can print this report or send it by e-mail.

To make you search more comfortable PDF Index Assistant provides custom search options, where you can setup your preferable search settings, such as folders to search in and files to search for.

PDF Index Assistant costs \$30.00 (US) (personal license). 30-days evaluation version of PDF Index Assistant is available from [www.index-pdf.com](http://www.index-pdf.com)

## **Installation issues**

### **How to download PDF Index Assistant**

Please, visit <http://index-pdf.com/download.htm> and download the latest version of PDF Index Assistant.

### **How to install PDF Index Assistant**

First you should download PDF Index Assistant from [www.index-pdf.com](http://www.index-pdf.com). Run downloaded exe file and follow instructions of setup program. Finishing installation you can choose whether to run PDF Index Assistant or run PDF Index Assistant's usage manual.

### **How to uninstall PDF Index Assistant**

Select PDF Index Assistant option in Start -> Programs menu and select "uninstall".

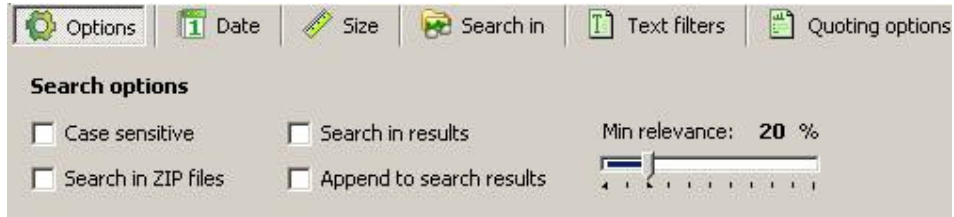

## **Get Started**

How to get started with PDF Index Assistant.

- 1) Run PDF Index Assistant.
- 2) Select Create Index command in File menu
- 3) Follow instructions to create index
- 4) Select Open Index comman in File menu.

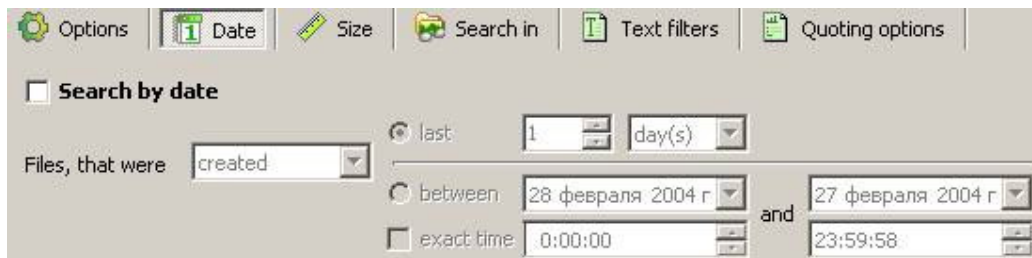

## Options

### Usage:

1. Case sensitive. PDF Index Assistant will think that a\*.txt means exactly a\*.txt (not A\*.txt)
2. Search in zip files.
3. Search in results - searching in results of previous search
4. Append to search results - will add newly founded files to current search results
5. Min relevance - is the minimal relevancy level. Files which are less relevant to search phrase will not be included to search results.

Date search options.

### Usage:

1. To activate date search options you should check "Search by date" check box.
2. You should specify type of date (creation/access/changed)
3. Then you should specify time interval
4. With PDF Index Assistant you can do precise time search, you can specify time of creation - 12:02:12. So you can easily find files that were creates from 12:02:12 to 12:02:30.

Size search options.

Usage:

1. Check "Search by size" check box
2. Specify size interval

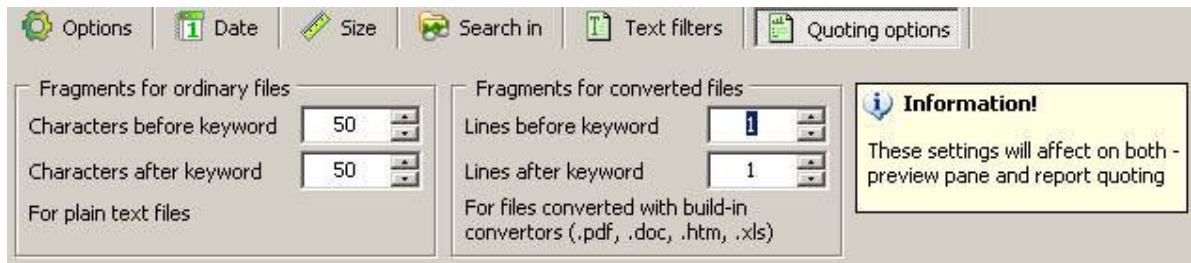

Search in options.

Usage:

1. Select path and click "Delete folder" button to remove unnecessary search paths
2. Click "Add path" button to add some path to search in (it can be network drive too)

Note:

PDF Index Assistant will first will search in the first item of the list (on picture it is "A:\"), then on "C:\" and so on. So you can specify the search queue by changing the position of path in "Search in..." list.

Quoting options:

Quoting options tag contains information about displaying lines of files within search results.

**Quoting options affect:** preview pane, search report

Please note: for plain text files you can specify only number of characters to display before and after found keyword. For .pdf, .doc, .htm, .xls and for other files that PDF Index Assistant convert before displaying, you can specify the number of lines to display.
